## PROJECTS / OPEN-SOURCE

### CALCULATOR

HTML,CSS,JavaScript

Design a user-friendly interface where users can input numbers and operators. I create a graphical user interface (GUI) using a programming framework like JavaScript with HTML/CSS, or any other suitable technology.

Capture user inputs (numbers and operators) and display them on the calculator screen.

### FILE SHARING WEB APPLICATION

React.js,Node.js,Express.js,MongoDB,CSS

- 1.The web application allows users to upload any type of file and generate a unique link for each file.
- 2.The web application uses MongoDB as the database, Express.js as the web framework, React.js as the front-end library, and Node.js as the back-end runtime environment.
- 3.The link can be shared with anyone who wants to download the file, without the need for registration or login.
